

BLUEKEY CELL PHONE CONTROL SYSTEM

ADD CELL PHONE REMOTE CONTROL TO YOUR PRODUCTS WITH BLUEKEY'S OEM DEVELOPMENT PROGRAM.

BlueKey Wireless Systems Inc. the leading manufacturer of Bluetooth® control systems introduces the first universal remote control product enabling mobile Bluetooth devices to perform a wide variety of remote control functions such as multiples homes, boats, vehicles or any other devices all controlled with the same cell phone.

The BlueKey cell phone System consists of a Control Module transceiver, and application software installed on a cell phone or other compatible Bluetooth® mobile device. There are multiple versions of the Control Module to accommodate various control interfaces and budgets. A wide selection of device Application software can be available for most system interfaces. The system is capable of two-way RF communications for status feedback, from the handset and Auxiliary hardwired inputs also allow additional status feedback information.

The company's business model is licensing targeted reference designs to manufacturers worldwide from multiple vertical markets such as; Security, Automotive, Access control, A/V Appliances, Door/Gate operators, Home/Commercial controls, Medical, and Instrumentation. BlueKey's core technology involves mobile device application software and transceiver hardware and firmware. BlueKey works with the client to design the target design, maintain mobile device compatibility including backend administration and delivery services.

BlueKey Wireless Systems provides the OEM client with the following application tools:

- Reference design and integration support for hardware and associated firmware
- Functional customization of the handset software application.
- Optional product feature development.
- Application downloading tools and products.
- Application server and co-branded user portal.
- Client administration server access for marketing and billing information.
- End user billing services as required.
- Ongoing development for software integration for mobile devices platforms releases.
- Ongoing development of firmware upgrades or enhancements.
- Right to include new Bluekey features as released.
- Use of the BlueKey brand logo (required)

BlueKey Wireless Technologies Inc. provides all the technology and ongoing support services required to significantly offload your integration efforts and enable a complete mobile device system interface.
